## DEEP FOUNDATIONS

### Foundation Piling

Cajun Constructors, Inc. has installed deep foundation systems for more than two decades—drill shafts, driven piles, auger cast in place piles—you name it we've done it. On land or water, our meticulously maintained equipment and committed crews can tackle any deep foundation project. Every Cajun project is completed with our total commitment to Safety, Quality and Schedule, continuing Cajun's reputation for quality construction that has become the hallmark of the deep foundation industry. Our veteran team will customize our equipment to meet our clients' differing project conditions—limited head room, limited access, over water, sloped grades—you name it—we can do it. Visit our website, [www.cajunusa.com](http://www.cajunusa.com) to learn more about Cajun Constructors.

### Drill Shafts

As a specialty contractor in the deep foundation industry, Cajun Constructors brings experience and professional standards to the area of Drill Shaft Installations. Cajun's expert drillers can tackle any drill shaft installation problem no matter how big or small. We perform drill only and complete turn-key drill and place services. With over 30 years of experience in heavy civil/foundation business Cajun has the equipment and personnel to deliver a safe and quality drill shaft project for you whether it's on land or over water. Our diverse drilling equipment includes limited access and limited overhead drilling rigs in sizes to suit any project restrictions you may have.

## Sheet Piles and Cofferdam Systems

Cajun Constructors' deep foundation services include innovative sheet pile and cofferdam installations. From cofferdams in Texas' Rio Grande River to pipeline trenches in the Gulf Coast Petro-Chem plants to intake structures in the middle of Georgia's lakes, Cajun brings our hands on, design/build approach to our clients' sheet pile and cofferdam projects. No matter if it's a marine or land project, Cajun Constructors has the experience and the people to complete you project safely, on time, and with the quality workmanship our clients have come to expect.

## Driven Piles

Cajun Constructor's expansive fleet of top quality pile driving rigs provides our clients with first-rate pile driving services. We install precast prestressed concrete, timber, H-pile, composite, and pipe piles. Our complete arsenal of hammers, leads, and drills allows us to customize our rigs to meet any piling project challenge. With our state of the art software, Cajun Constructors can perform in-house, wave equation analysis of pile driving.

## Auger Cast In Place Piles

In addition to our standard deep foundation systems Cajun Constructors offers ACIP pile installation. As a rapidly growing deep foundation system ACIP piles require a very high level of installation expertise. Cajun Constructors brings this high level of expertise to all of our ACIP pile projects. Cajun's meticulously maintained cranes, hydraulic drills and grout pumps ensure our projects run on schedule and well above industry quality standard. Access problems? Our limited access rigs can put ACIP piles anywhere you need them. Cajun also outperforms other ACIP contractors in safety by using our patented auger-cleaning tool that eliminates accidents involved with manual auger cleaning.
